

WORLD-CLASS LUBRICATING SYSTEMS & EQUIPMENT

Bijur Delimon is a global leader in the design and manufacturing of world-class lubrication systems and equipment. As innovators of engineered lubrication technology since 1872, our commitment to quality product and customer service ensures your lubrication system meets the highest industry standards.

DUALINE SYSTEMS

The most respected name in the industry for dual line divider valves now features high-pressure central pumping stations.

RESISTANCE SYSTEMS

Low-priced, small-sized, low pressure oil systems for use with meter & control units on small or medium sized machinery.

SINGLE LINE INJECTORS

Precise outputs & flexible design for oil/fluid grease & grease systems on a wide variety of industrial & mobile machinery.

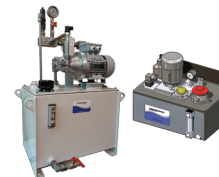

SINGLE POINT LUBRICATORS

Tough polycarbonate reservoirs & spring-driven greasers, along with drip oilers for individual bearing lubrication.

SERIES PROGRESSIVE

Positive displacement non-adjusting divider valves with fail-safe monitoring & robust lubricators handle oil & grease applications.

CIRCULATING OIL SYSTEMS

Configurable standard Oil Recirculation systems to a fully customized package. Including pumps, filtration, h/exchangers, controls, etc.

AIR/OIL SYSTEMS

Fully stand alone system with precise delivery & environmentally friendly. Reduce waste & extend component life.

GEAR SPRAY SYSTEMS

Intermittent spray technology to reduce lubricant consumption. Optional enclosures provide "plug-and-play" installation.

MONITORING & ENCLOSURES

Monitors to protect your critical equipment. Enclosures for dirty environments & "plug-and-play" installation.
